

## JESÚS BERMEJO TIRADO

Email Address  
jesus.bermejo@uc3m.es

Institution Name  
Universidad Carlos III de Madrid

Country  
Spain

Research Area  
History, Geography, and Art

Thematic Focus  
Archeology

Stakeholders involved  
Municipalities, citizens

Research Phase  
In progress

## RESEARCH ASSET

### *OPEN DIGITAL ARCHAEOLOGY LABORATORY (LADA)*

This laboratory is the result of the latest projects on domestic economies in northern Roman Carpetania. The researcher's career focuses on the social analysis of different communities in various provincial settings of the Roman Mediterranean. He is a specialist in the household archaeology of Antiquity.

This laboratory provides an opportunity for the local population to get to know the archaeological heritage of Madrid and its management, as well as contribute to research and the free, open dissemination of the findings. In addition to this, it provides participants with the opportunity to receive the basic training needed to start archaeological research.

A volunteer programme has been launched within the framework of this project. People

interested in the project will meet for two hours a week to work on archaeological materials linked to various archaeological projects within the Community of Madrid.

Volunteers will receive training in different areas, including archaeology and digital humanities, archaeology in the Madrid area, digital tools, open access databases, CAD software, geographic information systems (QGIS).

This lab follows the CERI (community engaged research initiatives) and citizen science philosophy.

**REVALORISE**<sup>+</sup>  
enhancing research impact

[www.revalorise.eu](http://www.revalorise.eu)

## POTENTIAL VALORISATION AREAS

- **Collaboration with scientists** from the same field or others for a multidisciplinary approach to the topic
- **Collaboration with government**, mainly at the regional and local level to disseminate and fund the citizens lab
- **Collaboration with nongovernment**, any organization or association that has interest into sponsoring or disseminating research and helping create and implement activities to engage the citizens in the project.

*Citizen science can be a reality that enriches all. The “OPEN DIGITAL ARCHAEOLOGY LABORATORY (LADA)” is an enthusiastic initiative embracing CITIZEN SCIENCE IN SOUTH-EUROPEAN ARCHAEOLOGY.*

## DESCRIPTION OF VALORISATION ACTIVITY

- **New research**
- **New publications**
- **Actual involvement in the application of research together in collaboration with stakeholders**
- **New research model community engaged based..**

## VALORISATION TARGETS/POTENTIAL FUTURE COLLABORATORS

Short description of the stakeholders that can be important for future collaborations:

- Municipalities and regional authorities of Madrid
